

PRESS RELEASE

DP•Win™ SOFTWARE PLATFORM ADDS MAJOR FEATURES

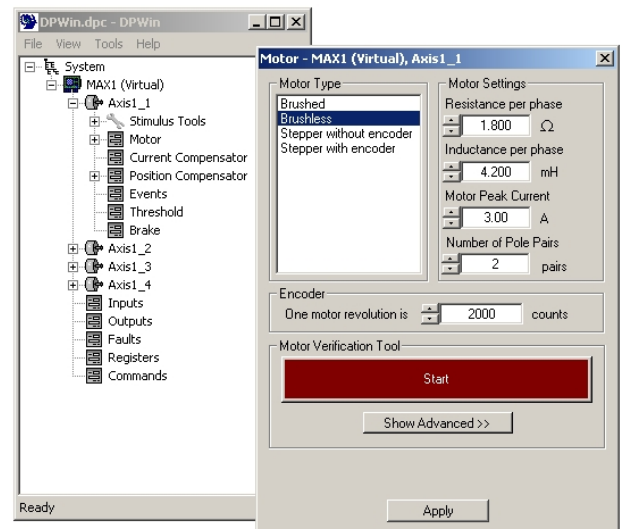

February 2, 2005

Agile Systems, a leader in distributed motion control solutions announces major enhancements to its software platform for its line of Distributed Motion Control products. Version 10 includes powerful new features and improvements to increase control and flexibility of the Max™ product line of motion control products. The version 10 software provides a seamless way for customers to transition from older versions of software and includes further enhancements to its bundled suite of software products including: **DPWin** windows configuration and tuning tool, **MAXCLib** motion library and **MAX3000** application software.

The software contains an advanced motor verification tool that will detect wiring problems, automatically configure motor parameters, and select an appropriate commutation method in a quick and easy user friendly fashion. Other features include stepper motor support, switched-mode (trapezoidal to sinusoidal) commutation methodology, and IEEE 1394b compatibility.

Key features of v10 software are:

- Improved smoother trajectory generator
- Automated wiring verification tool
- Switch mode commutation (hall-to-encoder)
- Stepper motor support
- Cascading IIR filters
- Improved stand alone development platform
- Easy to read manual and technical documents
- Event log
- FireWire® 1394b support

Agile Systems is a world leader in the design, development and manufacturer of advanced motion control technology including motor control and power conversion. With expertise in integrating power electronics, digital control and network communications in small, cost effective packages, Agile Systems has established customers in a broad range of industries including semiconductor, life science, robotics, automation equipment, automotive, industrial machinery and alternative energy. Agile Systems is based in Waterloo, Ontario.

FireWire® and the FireWire symbol are trademarks of Apple Computer, Inc., registered in the U.S. and other countries.
